The Company was founded in 1960. From the very beginning, its activity was mainly involved in the manufacturing of: MACHINES AND EQUIPMENT FOR DAIRY INDUSTRY and DRINKS PRODUCTION and many other fields for the processing of food products. In this field the Company can offer a wide experience and different proposals, from small to large scale productions, such as:

- UHT Tubular plants
- PLATE HEAT EXCHANGERS: plants for the pasteurisation and for thermal processings (heating and or cooling) of different kind of product (milk, cream, ice-cream mix, fruit-juice, beer, wine, eggs mixture, and many others).

These plants are "TAILOR-MADE" designed according to customer's specific requirements.

- CREAM BATCH PASTEURISERS
- BUTTER CHURNS -a wide range of models is available, from 20 to 3.000 L capacity
- SEMI-AUTOMATIC BUTTER MOULDING AND WRAPPING MACHINES
- MARGARINE LINES
- FRUIT JUICE LINES - TOMATO
- SOFT DRINK PROCESSING LINES
- CARBONATED AND NATURAL WATER PASTEURISATION PROCESS

Other products for which the Company is worldwide known are:

- COMPLETE INSTALLATION ON "TURN - KEY" basis
- AUTOMATION - KNOW HOW AND ENGINEERING
- MINI DAIRY PLANTS - designed and manufactured to fit requirements of small productions, completely independent skid mounted and autonomous units for the production of:
PASTEURISED DRINKABLE MILK - YOGHURT - DIFFERENT KIND OF CHEESES - BUTTER;
- AUTOMATIC PACKAGING MACHINES, for liquid products and "pasta filata" cheese:
- BEER PRODUCTION PLANTS
